

# Ultra-slim and super-compact in a unified & convertible format.

**SLIM &  
MODULAR**

with technology  
**Click&Go**  
ZEROTIME®

Insert the plug connector...  
snap it in place...  
that's all you need  
for a perfectly working  
system...

**Click&Go!**

Stop/go display  
**SLIM-DUALUX**

Stop/go sensorized display  
**SLIM-DUALUX No-touch**

Push-button unit  
**SLIM-DUALPUSH**

Push-button with  
"mushroom"  
**SLIM-HELPPUSH**

Intercom unit  
**SLIM-DUALVOX**

## Unified module because....

A full SLIM & MODULAR range of devices with different functions, operations and purposes (stop and go displays, entryphones, keypads, such as code keypads, badge readers and micro stop and go display control units of the same series...) designed and made keeping a single module of the same size for all as a base element.

In fact, all the devices have the same appearance, size and modularity to be interchangeable and housed in the same unified chasing of the previous lock.

## Convertible because...

Using unified flanges, cases and boxes, any unified SLIM & MODULAR device is convertible into 5 different types that can be installed in any way, next to the door, based on the assembly needs found in the field.

Assembly type

**1**

**fully aligned concealed**  
for recess-mounting  
without flange  
on the same plane of  
the door frame panel

Unified body of modular device recess mounted set flush into surface door frame level

Assembly type

**2**

**fully aligned at milling**  
for recess-mounting  
with front flange  
on the same plane  
of the panel surface

Unified body of modular device with front flange

Assembly type

**3**

**for conventional flush mounting**  
with front flange  
overlapping door frame

Unified body of modular device with conventional front flange

Assembly type

**4**

**for surface mounting**  
with using housing

Unified body of modular device included in housing

Assembly type

**5**

**for recessed wall-mounting**  
with flange and wall-mounting  
receptacle

| SLIM-DUALUX stop and go display type 2 "CLICK & GO" technology for aligned recessed flush fitting in bottom of panel using front flange (e.g. To mount on wall panel next to the door frame on the post where no chasing can be carried out). Supplied with front flange in anodized aluminium with "silver" finish - 250 x 50 mm, thickness 2.5 mm for recess-mounting on the same plane of the panel surface for aligned recessed flush fitting in bottom of plane using front flange. Cover pre-assembled and fixed into the flange niche.<br><b>♦ In this case, it is advisable to prepare sunk milling during the panel machining phase.</b> | 034982CW2U                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                                                                                                                                                                                                                                                                                                                                              |        |    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |            |  |                                                                            |             |  |                                                                         |            |  |                                                                                                                                                |            |  |                                                                            |             |  |  |

**Special configurations available at extra charge:** Cover with your logo and/or customized.

For sizes, measurements and details of chasing, application examples and connection diagrams, see page 21.

# SLIM-DUALUX STOP & GO DISPLAYS - sizes, application examples and connection diagram

## Assembly type ① fully aligned concealed for recess-mounting on the same plane of the door frame panel without a flange

## Assembly type ② fully aligned at milling for recess-mounting with front flange on the same plane of the panel surface

## Assembly type ③ for conventional flush mounting with front flange overlapping door frame

## Assembly type ④ for surface mounting with using housing

## Assembly type ⑤ for recessed mounting in wall-mounting receptacle with flange and wall-mounting receptacle

## Examples of Wirex fast connecting cables for "CLICK & GO" models

**SINGLE CONFIGURATION**  
Each Stop/Go display has its own MASTERWIREX control cable.

**MASTER-SLAVE CONFIGURATION**  
Two Stop/Go displays coupled in "tandem" by means of a TANDEMWIREX jumper and one MASTERWIREX control cable.
